The pet follows its owner and follow the commands, as in real life. MapleStory pets are not really a live animal per se. Instead, they are dolls that have been brought to life by a wandering magician in Henesys named Cloy. Cloy sprinkles the water of life extracted from Ellina to make them a living pet. As soon as the water of life dries up, the pets return to the doll's condition. However, you can collect the water of life by putting a fairy in the forest of Marra to revive your pet. Pets react in a certain way when ordering the owner, and even if they can't attack monsters, they can equip upgrades to capable items, helping their owner in the process. The pet can be purchased at the checkout. Once purchased, it is stored under the Pet inventory tab. Double click on the pet tab to take the animal out of the inventory. Double tap the animal while it's outside to return it to the inventory. Each pet is a little different from each other, so it is necessary that you read the instructions carefully before you make a purchase. Pet Elements When you first buy a pet, it's without a name. The pet will react much better to your commands with a name called along with orders. To do this, you will need to name your pet and use the pet naming item. Items of equipment for pets can be upgraded to add speed and ability to jump. These updated attributes will be applied to the owner of the animal. When the water of life runs out, the animal turns back into a doll. To bring your pet back to life, you need to visit Mar Fey in Elnia. You will need to get the water of life and scroll life to complete the quest in order to bring the animal back to life. Water of life can be purchased at the cash register. Mar asks you to look for Bartos instructor in Henesys to get the scroll. Take a walk along Pat Road in Henesys to find it. Once you mention Mar Fey, he'll give you a couple of tests to pass the life scroll. Instructor Bartos will give you 5 questions regarding pets. If all the questions are answered correctly, you will receive a scroll; Otherwise, you'll have to start from scratch. You can repeat the test over and over again. Once you get a scroll of life and water of life, bring them back to Mar Fairy at Henesys, and the pet will be brought back to life. Once the animal is purchased at the checkout, it is stored under the Pet inventory tab. Double click on the item on the pet tab to take the animal out of the inventory. Double tap the animal while it's outside to return it to the inventory. Each pet is a little different from each other, so it is necessary that you read the instructions carefully before you make a purchase. Types of pets there are a number of different types of pets, whether it is a dog, a rabbit, or a cat. Command For each pet, and as the pet levels increase, the number of commands available also increases. Brown Kitty Is Good for 90 Days. They are quiet and in nature, so they don't go craving for food too often. They don't seem to be too obedient to their owners. It can be purchased at the cash register. Although unable to attack monsters, pets can equip skills and upgradeable items to help their owners. Pets come to life wandering wizard Cloy, who sprinkles the water of life extracted from Ellina to make live pets from dolls. Once the water of life dries up, usually after 90 days, the pet turns back into a doll. If someone wants to revive the pet, they will have to collect the water of life from the cash register and complete the quest. However, some pets are permanent pets that will never have their water life dry. DoofusPet Food Merchant Pets teams respond to the commands mentioned in the chat window, and pets with higher levels respond to more of them. Pets that 15 and above, may be ordered to speak in any specific dialogues desired by the owner by entering /animal (speech). Pet owners with named pets can also enter Name (command) to deliver commands to a particular pet. Pet guidebooks containing teams are either bought from NPCs selling pet food or dropped from some monsters. Pet Lv. Req.
